Notes:

$$\frac{\text{Total Quantity loaded / unloaded by HMC}}{\text{Total time taken from vessel commencement to completion}} \times 24 \text{ hrs}$$
- (ii). According to the average berth-day output for the vessel from commencement to completion of loading / discharge of cargo, the appropriate rate of crane hire charge will be chosen for recovery from port users for the full quantity of cargo loaded / discharged.
- (iii). If one HMC works with another HMC or ELL crane/s, the Berth-day output for the crane will be ascertained on the basis of the quantity as recorded by the HMC's load meter.
- (iv). In case of breakdown of the crane for more than one hour till the vessel leaves the berth, the quantity handled by HMC will be determined taking into account cargo loaded / discharged prior to break-down divided by crane working hours and multiplied by 24.
- (v). In case of stoppages of operation of HMC for more than two hours at a stretch for reasons not attributable to the HMC, appropriate allowance will be allowed to the crane while calculating the total time of crane operation in the vessel. Stoppages of HMC for less than 2 hours will not be taken into consideration for the above purpose. No allowance will be allowed for stoppages attributable to the HMC. All stoppages in loading / unloading operations during working of HMC are required to be certified by the Stevedore of the vessel in the daily vessel performance report.

- (vi). In case shifting of a vessel becomes necessary due to breakdown / non-performance of HMC, the shifting charges of the vessel from berth to anchorage will be recovered from the crane operator in addition to a penalty of ₹ 1,00,000/- (Rupees one lakh only). The shifting charges so recovered will be refunded to the vessel's agent while the penalty will be retained by the port.
- (vii). In case of dispute on the average output, the decision of the port trust will be final and binding”.
